

INVITATION TO PARTICIPATE IN AN ONLINE SURVEY ON THE USE AND USEFULNESS OF SENSOR DATA

We would like to invite you to participate in this voluntary, on-line emergency management industry survey. The survey asks you to share your opinions and experiences regarding the use and usefulness of sensor data from satellites, planes and ground based sensors, including social media, for supporting emergency management decision-making. You **do not need** any formal background in or understanding of data to participate in the survey.

The survey is being conducted by the *Australian National University in collaboration with Geoscience Australia, the Cooperative Research Centre for Spatial Information and the Bushfire & Natural Hazards Cooperative Research Centre.*

The validity of the survey is dependent upon strong industry participation and we would very much appreciate your time in completion the survey. It is expected that the survey will take around 15 minutes to complete.

This invitation has been made available to you because we understand that you are involved in the disaster data supply chain in your role.

To see the survey, go to [<https://www.surveymonkey.com/s/WTKC3KJ>]. This website also provides more information about the survey, why it is being conducted, and how your survey data will be used, and how your confidentiality is ensured.

If you have any questions or concerns about the survey please don't hesitate to contact David Hudson on david.hudson@anu.edu.au

Regards,
David Hudson
